5 REASONS TO CHOOSE ARCADIA

1 PROTECTION

The sliding cover of Arcadia and Arcadia-K allows you to easily open and close the top canvas, providing the freedom to manage the outdoor space effectively at any time of the day.

Arcadia-K, the evolution of Arcadia, channels rainwater inside the vertical posts through the perimeter housing and gutter system, directing it to the ground.

2 MINIMALIST DESIGN

The essential and linear shapes, combined with minimalist design, are a distinctive feature of our Arcadia and Arcadia-K pergolas. These modern structures represent a synergy of innovation and elegance, creating an environment that harmoniously blends with any outdoor landscape.

3 MINIMAL MAINTENANCE AND DURABILITY

Arcadia and Arcadia-K, thanks to their simplicity and essential design, require minimal periodic maintenance, limited to cleaning the aluminum profiles and the cover. Aluminum and PVC are the materials we have always preferred for our structures, being lightweight, durable, and corrosion-resistant, designed to last over time while maintaining their properties unchanged.

4 STRENGTH AND PRACTICALITY

Arcadia and Arcadia-K stand out for their mechanical excellence and feature a manual sliding cover with special carriages, providing smooth and silent movement, eliminating the need for a motorized system. Additionally, the integrated magnetic locking system for the cover is highly resistant to wear and breakage, ensuring long-term reliability and high-level functionality.

5 EASE OF INSTALLATION

The design precision, combined with the simplicity of the components, is a crucial element that ensures incredibly fast installation times. Every element of our Arcadia and Arcadia-K pergolas has been designed to minimize the time and effort required for assembly.

STANDARD VERSION

PERGOLA WITH SLACK FABRIC

A R C A D I A ^{STD}

STANDARD VERSION

The pergola with a manually operated sliding cover represents a timeless classic, the perfect fusion of form and function. Arcadia's minimal design, with essential lines, seamlessly blends with the surrounding environment, creating a space where landscape and architecture converge to ensure maximum comfort and relaxation.

The warm color range and the matte finish of thermosetting epoxy powder coatings, oven-cured, enhance the product's quality and resistance to the effects of time, giving Arcadia a more welcoming appearance in harmony with natural elements.

The structure can be complemented with numerous accessories, such as the integrated LED light kit on the rafters, providing uniform and functional lighting to the entire space below.

Arcadia can be completed with a self-leveling floor composed of an aluminum frame and a choice of finish. The Horizon flooring can be weighted, eliminating the need for ground anchors.

VERSION WITH INTEGRATED GUTTER

PERGOLA WITH SLACK FABRIC

A R C A  D I A - K

VERSION WITH INTEGRATED GUTTER

Arcadia-K is the version with integrated perimeter guttering that directs rainwater inside the vertical posts, providing high protection against rainfall.

The presence of the housing and the gutter profile allows for the installation of various types of perimeter walls, ranging from simple sliding PVC walls to ZIP sliding walls and elegant glass walls.

Arcadia-K can be completed with a self-leveling floor consisting of an aluminum frame and a choice of finish. The Horizon flooring can be weighted, eliminating the need for ground anchoring.
